AIR-GAPPED SOVEREIGN COMPUTING FOR CYBER SECURITY & IT FLEETS

Zero Cloud Telemetry • SIMD Hashing Pipelines • Hardware Data Destruction • DPDP 2023 Compliant

ZERO-TRUST AIR-GAPPED

THE 3 CRITICAL SECURITY VULNERABILITIES OF CLOUD-DEPENDENT IT TEAMS

Unscrubbed Hardware Leaks

Standard Windows deletes leave raw file bytes recoverable on recycled SSDs/HDDs, risking statutory non-compliance penalties up to ₹250 Cr under India's DPDP Act.

Cloud Clipboard Snoopers

Cloud-synced clipboard utilities transmit private SSH keys, AWS credentials, database secrets, and client tokens to offshore third-party servers.

The Enterprise SaaS Tax

Paying $96 to $240+ per developer seat annually for basic hash verifiers, diff utilities, and data wiping tools locks IT budgets into endless subscription traps.

The RQL Sovereign IT Fleet Solution: 100% Offline Native Rust Workstations

Every IT utility from Rehan Quant Lab is compiled in 100% pure native Rust into standalone Win32 PE32+ executables. Zero cloud connections, zero background telemetry daemons, zero Electron/Node bloat, and zero runtime dependencies. Formally analyzed and certified clean by Microsoft Defender Security Intelligence.

`DoD 5220.22-M 7-Pass` `Gutmann 35-Pass Eraser` `AES-256-GCM ClipVault` `4.8 GB/s SIMD Multi-Core Hashing` `Myers O(ND) Syntax Diff` `100% Air-Gapped RAM Execution`

Zero Telemetry

Zero background pings, zero tracking analytics, zero remote API calls. All keys and data remain in physical RAM.

Perpetual Asset

Single team purchase, lifetime ownership. Eliminate recurring SaaS seat licenses from your annual IT budget.

Pure Rust Speed

Instant microsecond cold boots, SIMD AVX2 acceleration, and under 25MB RAM footprint on 64-bit Windows.
