# HIGH-PERFORMANCE AIR-GAPPED WORKSTATION SUITES FOR DESIGN & MEDIA

CREATIVE & MEDIA

100% Native Rust PE32+ • Zero Monthly SaaS Subscriptions • Infinite Vector Scalability

## THE 3 CRITICAL TRAPS FOR MODERN STUDIOS & CREATIVE AGENCIES

**Font Copyright Lawsuits**
Agencies risk $50,000 copyright penalties when staff accidentally embed restricted or non-commercial fonts into client logos, packaging, and commercial apps.

**SaaS QR Link Hijacking**
Cloud QR generators charge $120/yr and route scans through redirect servers that expire or show broken pages if subscription payments lapse.

**Bulk Asset Renaming Corruption**
Renaming thousands of RAW camera assets, 3D renders, and video clips with clumsy scripts risks overwriting originals and breaking media pipelines.

## The RQL Sovereign Solution: 100% Offline Creative Asset & Typography Engines

Every tool from Rehan Quant Lab is hand-forged in 100% pure native Rust with compile-time memory safety. Pure Win32 PE32+ binaries execute directly on physical workstation silicon with zero external network pings, zero Electron bloat, zero Python interpreters, zero cloud SaaS dependencies, and air-gapped cryptographic hardware licensing (`license.rql`). Formally analyzed and certified clean by Microsoft Defender Security Intelligence. Tested ruthlessly on 50,000+ font libraries and massive raw media directories.

`fsType Legal Font Audit` `ISO/IEC 18004 Vector QR` `Collision Armor Atomic Rollback` `Zero Telemetry`

**Zero Telemetry**
Zero background network calls. Client brand identities, assets, and typography stay locked in RAM.

**Perpetual Ownership**
Pay once, own forever. Zero monthly SaaS subscription fees, zero forced vendor price hikes.

**Vector Scalability**
Pure mathematical SVG vector generation ready for offset packaging, retail tags, and billboards.

**14-Day Guarantee**
100% risk-free. If it fails to boot instantly or eliminate SaaS expenses, full unconditional refund.
