AIR-GAPPED SOVEREIGN COMPUTING FOR JUDICIAL COUNSEL

Protecting Attorney-Client Privilege • Zero Cloud Leaks • Court-Admissible Forensic Precision

BAR & DPDP 2023 COMPLIANT

THE 3 CRITICAL CLOUD TRAPS FOR MODERN LEGAL CHAMBERS

Violations of Indian DPDP Act 2023

Filing discovery documents or client briefs containing unredacted Aadhaar, PAN, or health records risks catastrophic statutory penalties up to ₹250 Crores under India's new privacy law.

Redaction Leaks in Court

Standard PDF editors merely paint black rectangles over text while preserving underlying character streams and metadata, enabling opposing counsel to copy-paste confidential evidence.

Cloud Deposition Exposure

Web AI audio transcription services upload privileged witness statements and client depositions to remote third-party cloud servers, violating strict attorney-client privilege.

The RQL Sovereign Solution: 100% Air-Gapped Workstation Execution

Every tool from Rehan Quant Lab is hand-forged in 100% pure native Rust with compile-time memory safety. Standalone Win32 PE32+ executables operate entirely within physical workstation RAM without touching external cloud servers. Zero Electron memory leaks, zero Python runtimes, zero background network pings, and air-gapped cryptographic hardware licensing (`license.rql`). Formally analyzed and certified clean by Microsoft Defender Security Intelligence.
