# OFFICIAL INSTITUTIONAL SECURITY, CLEARANCE & STATUTORY INTEGRITY ATTESTATION

CLEAN VERIFIED

Dual-Fortress Verification: Microsoft WDSI Malware-Free Sandbox Attestation • Government of India Ministry of MSME Recognition

## 1. Statutory Government MSME Registration

| | |
|---|---|
| Enterprise Trade Name | **REHAN QUANT LAB** |
| Permanent URN | `UDYAM-BR-26-0258772` |
| Statutory Authority | **Ministry of MSME, Govt. of India** |
| Enterprise Category | **Micro Enterprise • Services (Non-Trading)** |
| Primary NIC-2008 Code | `62011 (Computer Programming)` |
| Registered Jurisdiction | **Unit 1, Patna, Bihar, 800006, India** |
| Proprietor & Architect | **MOHAMMAD REHAN** |

## 2. Microsoft WDSI Sandbox Clearance

| | |
|---|---|
| Testing Cluster | **Windows Defender Security Intelligence** |
| Commercial Fleet Scope | **All 13 Sovereign Titans (PE32+ Standalone)** |
| Static Heuristic Clearance | `PASS • 0 False Positives` |
| Dynamic Execution Sandbox | `PASS • 0 Telemetry • Clean` |
| Submission Status | `COMPLETED • VERIFIED CLEAN` |
| Cryptographic Hashing | `FIPS 180-4 SHA-256 (64-Hex)` |
| Anti-Tamper Protocol | **Local NVMe Hardware Attestation** |

## ZERO-TRUST SOVEREIGN ENGINEERING DOCTRINE

### Direct Silicon

100% native Rust PE32+ execution. Zero Python, Node.js, or Electron runtime dependencies. Direct Win32 hardware acceleration.

### 100% Air-Gapped

Zero outbound network pings. Zero telemetry daemons. Customer files and ledgers strictly reside in local volatile RAM and storage.

### Hardware Key

Cryptographic `license.rql` hardware-attested licensing. Single one-time purchase with perpetual lifetime execution rights.

### Court-Admissible

Immutable SHA-256 audit trails. Tamper-evident forensic ledgers compliant with DPDP 2023, GDPR Article 32, and HIPAA.

## Solemn Institutional Attestation of Authenticity & Integrity

I, Mohammad Rehan, Sole Proprietor and Quantitative Architect of Rehan Quant Lab, hereby officially certify that every commercial binary release within the RQL Sovereign Fleet is compiled natively from audited Rust source code under cleanroom laboratory conditions. No binary contains backdoors, telemetry sniffers, keyloggers, remote kill-switches, or third-party advertising modules. All software packages comply fully with the statutory provisions of the MSME Development Act, 2006 (Government of India) and the technical standards verified under Microsoft WDSI Submission IDs documented on Page 2.

**Executed by: Mohammad Rehan**

### >_ Independent Cryptographic Verification Procedure (Client-Side)

Institutional security teams and enterprise compliance auditors can independently verify the cryptographic chain of custody of any downloaded binary using standard Windows PowerShell command line utilities without installing any proprietary software:

```
Get-FileHash -Algorithm SHA256 "C:\Path\To\RQL_Suite_Master_Setup.exe" | Format-List
```

The returned 64-character hexadecimal SHA-256 string must match byte-for-byte with the registry above. Any mismatch indicates file tampering, transit corruption, or unauthorized alteration, and the binary must not be executed.
