ZERO-CLOUD MULTI-TILL COUNTER BILLING & REAL-TIME INVENTORY

100% Native Rust PE32+ • Zero Monthly SaaS Fees • Peer-to-Peer LAN Mesh Sync

COMMERCE & RETAIL

THE 3 CRITICAL CLOUD TRAPS FOR MODERN RETAILERS & SUPERMARKETS

Internet Outage Paralyzation
Cloud POS platforms lock checkout counters when broadband drops or cloud servers lag, forcing store owners to turn away paying customers during peak hours.

Unending SaaS Subscription Drain
Retailers bleed ₹3,000 to ₹12,000 per till every single month in SaaS fees, plus forced percentage cuts on payment processing and cloud backup add-ons.

Slow & Laggy Thermal Printing
Web browser-based billing software suffers 3 to 6-second print spooler delays per receipt, creating frustrating counter queues and lost sales volume.

The RQL Sovereign Solution: 100% Offline Multi-Till Local Mesh

Every tool from Rehan Quant Lab is hand-forged in 100% pure native Rust with compile-time memory safety. Pure Win32 PE32+ binaries execute directly on physical counter hardware with zero internet dependency, zero Electron bloat, zero cloud subscription fees, and air-gapped cryptographic hardware licensing (`license.rql`). Formally analyzed and certified clean by Microsoft Defender Security Intelligence. Tested ruthlessly against high-throughput checkout loads.
