REHAN QUANT LAB (RQL) • ARCHITECTURAL CODEX

THE 53 TITANS MASTER ARCHITECTURAL CODEX

Complete Sovereign Software Fleet: 53 Desktop Workstations Engineered in Pure Native Rust

100% PURE NATIVE RUST / WIN32 | 14 LIVE • MICROSOFT WDSI CERTIFIED | PERPETUAL AIR-GAPPED OWNERSHIP | ZERO CLOUD SUBSCRIPTIONS

> **The Harper & Presenton Sovereign Invariant:**
> *"If you cannot describe the core superpower of a software engine in ONE single sentence, it is either too complicated to sell, or you do not understand what problem you are solving."*

Founder & Chief Architect: Mohammad Rehan

Enterprise Registration: UDYAM-BR-26-0258772

Corporate Headquarters: Patna, Bihar, India

Date of Enterprise Commencement: 12/01/2023

Official Web Portal: https://rehanquantlab.com

Digital Storefront: https://quantify17.gumroad.com

Security Intelligence: 14 Clean WDSI Submissions (0.00 Threat)

Architecture Standard: Pure-Rust / Zero-Cloud / SIMD Core

Universal Portfolio Standard: 999,999 Mintage Cap per Titan • +30% Compound Escalation per Batch • Free Generational Upgrades for Life

Published by Rehan Quant Lab • November 2026 Edition • Sovereign Commercial Release

🏛️ UNIVERSAL INVARIANTS ACROSS ALL 53 SOVEREIGN TITANS

1. Strict Lifetime Cap (Zero Equity Dilution)

Every Titan software engine across the entire 53-product portfolio is mathematically capped at exactly **999,999 Perpetual Commercial Licenses** per major release series. Once the 999,999th license is minted on Gumroad or institutional channels, mintage terminates permanently.

2. The 4-Batch Price Escalation (+30% Compound per Batch)

To reward pioneer early adopters and institutional partners, prices escalate strictly across 4 mathematical tranches:

Batch 1: Pioneer	Batch 2: Growth	Batch 3: Scale	Batch 4: Sovereign
First 999 Licenses	Next 9,999 Licenses	Next 99,999 Licenses	To 999,999 Cap
Baseline Launch Price	**+30% Escalation**	**+69% Cumulative**	**+120% Cumulative**

3. 100% Free Lifetime Generational Upgrades

Every single license holder receives **free major updates for life (v1.0 → v2.0 → v3.0)** with zero recurring fees. When major generational editions re-issue, a fresh 999,999 mintage series opens exclusively for new market entrants.

4. The 5-Pillar Enterprise Dossier Standard

Every software workstation in this master architectural codex is articulated strictly through five non-negotiable structural pillars:

- **1. What is it?** — Architecture, Chassis & Product Form
- **2. What does it do?** — Concrete Mechanical Functionality
- **3. How does it do it?** — Pure Native Rust / Win32 Algorithmic Execution
- **4. The Results?** — Quantifiable Client Savings & Risk Elimination
- **5. The Harper & Presenton Invariant** — The Indestructible One-Sentence Superpower

📊 PART I: EXECUTIVE QUICK-REFERENCE MATRIX (ALL 53 TITANS)

#	TITAN NAME	CLASS / TIER	PRICE	HARPER & PRESENTON 1-SENTENCE SUPERPOWER
01	**RQL DocumentShield™**	Foundational Flagship	$149	Permanently burns redacted text into raw pixels and scrubs forensic metadata so confidential PDFs can never leak.
02	**RQL WhisperVault™**	Foundational Flagship	$299	Transcribes audio meetings and dictations 100% locally on CPU with millisecond Word/SRT sync and zero cloud eavesdropping.
03	**RQL Sovereign RetailPOS™**	Foundational Flagship	$169	Dispatches 80mm thermal receipts and balances shift cash drawers in under 10ms with zero internet and zero monthly fees.
04	**RQL StoreChain™**	Foundational Flagship	$179	Synchronizes retail checkout tills over an offline local router mesh with automatic failover if the shop internet drops.
05	**RQL Conduit™**	Foundational Flagship	$129	Transfers multi-gigabyte files between local PCs over direct P2P LAN sockets at raw wire speed without cloud middleman servers.
06	**RQL HashCheck™**	Tier 1: Atomic Surgical	$39	Streams multi-gigabyte files through SHA-256 and Blake3 in a single parallel pass to trap corrupted downloads instantly.
07	**RQL QRStudio™**	Tier 1: Atomic Surgical	$79	Generates permanent, non-expiring custom vector brand QR codes directly on your PC with zero cloud redirect middlemen.
08	**RQL TextDiff™**	Tier 1: Atomic Surgical	$89	Highlights contract clause alterations and code discrepancies side-by-side with millisecond precision and zero cloud exposure.
09	**RQL Renamer™**	Tier 1: Atomic Surgical	$47	Reorganizes tens of thousands of messy photos, invoices, and files in a single click using high-speed regex and sequential date rules.
10	**RQL TagEditor™**	Tier 1: Atomic Surgical	$47	Cleans audio library tags and embeds high-resolution album artwork directly into MP3, FLAC, and WAV files with zero re-encoding loss.
11	**RQL FontViewer™**	Tier 1: Atomic Surgical	$49	Renders and previews thousands of TTF, OTF, and WOFF typography glyphs instantly with zero system lag or font cache bloat.
12	**RQL DPDPShield™**	Tier 1: Atomic Surgical	$89	Destructively scrubs Aadhaar, PAN, and banking identifiers from client PDFs with 1-click DPDP Act 2023 court-admissible audit certification.
13	**RQL PriceTag™**	Tier 1: Atomic Surgical	$79	Generates batch retail shelf labels and price stickers with barcodes in seconds, eliminating handwriting errors on store shelves.
14	**RQL InvoiceGen™**	Tier 1: Atomic Surgical	$89	Generates 2-second sovereign PDF tax invoices with automated GST/VAT splits, thermal receipt dispatch, and dynamic UPI QR embedding with zero cloud telemetry.
15	**RQL CSVFormat™**	Tier 1: Atomic Surgical	$89	Deduplicates, sanitizes, and splits million-row CSV files in seconds without Excel freezing or cloud upload limits.
16	**RQL MarkdownPad™**	Tier 2: Document & Privacy	$49	Delivers a distraction-free, instantaneous offline Markdown desk with real-time vector preview and zero cloud syncing interruptions.
17	**RQL PDFMerge™**	Tier 2: Document & Privacy	$69	Merges, splits, and reorders confidential legal PDFs offline in seconds without exposing private client files to sketchy online converters.
18	**RQL FileShredder™**	Tier 2: Document & Privacy	$59	Overwrites sensitive client files using permanent multi-pass DoD 5220.22-M sector wiping so deleted data can never be forensically recovered.
19	**RQL ClipVault™**	Tier 2: Document & Privacy	$39	Stores and searches encrypted local clipboard history with zero background internet telemetry or accidental text overwrite loss.
20	**RQL ImageBatch™**	Tier 2: Document & Privacy	$69	Resizes, watermarks, and converts thousands of product images to WebP/JPG locally in seconds without cloud upload bottlenecks.
21	**RQL AudioExtract™**	Tier 2: Document & Privacy	$49	Rips pristine lossless audio tracks from large video files in one click without launching heavy editing software.
22	**RQL SubtitleSync™**	Tier 2: Document & Privacy	$89	Adjusts video subtitle timing with millisecond offset shifting and converts SRT/VTT formats offline without monthly SaaS subscriptions.
23	**RQL SpaceMap™**	Tier 2: Document & Privacy	$39	Visualizes disk storage with interactive high-speed treemaps to expose hidden gigabyte bloat and solve Disk Full errors instantly.

#	TITAN NAME	CLASS / TIER	PRICE	HARPER & PRESENTON 1-SENTENCE SUPERPOWER
24	**RQL DocProtect™**	Tier 2: Document & Privacy	$49	Locks confidential PDFs with authenticated AES-256 encryption, granular printing permissions, and dynamic watermarks offline.
25	**RQL CashDrawer™**	Tier 2: Document & Privacy	$89	Reconciles opening cash, shift payouts, and closing registers to stop register shortages and counter employee theft.
26	**RQL ReceiptPrinter™**	Tier 3: Systems & Network	$59	Tests and visualizes 58mm/80mm USB thermal receipt formatting directly against ESC/POS hardware with zero broken alignment.
27	**RQL DiskClean™**	Tier 3: Systems & Network	$49	Scans hard drives with multi-threaded byte hashing to purge duplicate files and hidden system junk without risking personal documents.
28	**RQL ArchiveMaster™**	Tier 3: Systems & Network	$39	Compresses and encrypts files into high-speed ZIP, 7z, and TAR archives with authenticated AES-256 and zero nag popups.
29	**RQL SocketShield™**	Tier 3: Systems & Network	$79	Inspects raw TCP/UDP socket payloads and flags anomalous outbound telemetry at the local socket boundary.
30	**RQL PingPulse™**	Tier 3: Systems & Network	$69	Monitors multi-endpoint latency with audible packet drop alarms to diagnose unstable Wi-Fi and ISP lag during trading or gaming.
31	**RQL FolderSync™**	Tier 3: Systems & Network	$59	Mirrors directories to external backup drives with delta-only copying and auto-sync triggers without recurring cloud storage fees.
32	**RQL ClientLedger™**	Tier 3: Systems & Network	$119	Manages appointment scheduling and encrypted client service histories locally on your workstation with zero monthly CRM rentals.
33	**RQL OrderCounter™**	Tier 3: Systems & Network	$149	Prints sequential customer queue tokens and coordinates takeout order readiness at food counters without internet dependency.
34	**RQL WinTune™**	Tier 3: Systems & Network	$49	Disables Windows telemetry tracking, removes pre-installed bloatware, and restores sub-10ms system responsiveness in one click.
35	**RQL MediaShrink™**	Tier 3: Systems & Network	$89	Compresses gigabyte video files into lightweight 25MB attachments while preserving sharp visual quality for email and chat sharing.
36	**RQL ScreenCap™**	Tier 4: Retail & Clinical	$99	Records crystal-clear 60 FPS desktop screen tutorials and microphone audio locally without watermarks, cloud lag, or monthly fees.
37	**RQL PharmaVault™**	Tier 4: Retail & Clinical	$149	Tracks 60-day pharmacy medicine expiry alerts and maintains Schedule H narcotics registers to eliminate stock loss and regulatory fines.
38	**RQL KiranaFlow™**	Tier 4: Retail & Clinical	$119	Clears supermarket checkout queues with single-key barcode billing while managing customer credit udhar balances 100% offline.
39	**RQL OpticalVault™**	Tier 4: Retail & Clinical	$179	Records patient eye refraction powers and manages spectacle frame inventory so opticians never lose patient lens histories.
40	**RQL MandiFlow™**	Tier 4: Retail & Clinical	$189	Computes agricultural auction slips in seconds (Bags x Weight x Rate - Commission), preventing cash disputes during mandi chaos.
41	**RQL MedTriage™**	Tier 4: Retail & Clinical	$249	Captures emergency clinic patient intake and critical drug allergy alerts in three keystrokes without slowing emergency doctor care.
42	**RQL LabReport™**	Tier 4: Retail & Clinical	$219	Formats clean diagnostic pathology lab test reports with anti-tamper verification QR codes without cloud software subscriptions.
43	**RQL ChequeMaster™**	Tier 4: Retail & Clinical	$79	Prints millimeter-accurate bank business cheques across all Indian banks while maintaining an automated clearing reconciliation log.
44	**RQL FleetTransit™**	Tier 4: Retail & Clinical	$279	Pulls live gross and tare vehicle weights directly from RS-232 serial weighbridge scales to eliminate operator slip tampering.
45	**RQL BiltyPro™**	Tier 4: Retail & Clinical	$239	Generates compliant 3-second transport Lorry Receipts (LRs) with automated e-Way Bill and freight tax calculations without internet.
46	**RQL AutoDistro™**	Tier 5: Mesh & Enterprise	$289	Empowers delivery vans to invoice rural retail shops and print Bluetooth thermal bills offline with end-of-route stock balancing.
47	**RQL ClothMatrix™**	Tier 5: Mesh & Enterprise	$249	Manages garment stock in a real-time 3D inventory grid (Size x Color x Brand) to prevent apparel retailers from over-ordering dead sizes.
48	**RQL LedgerGuard™**	Tier 5: Mesh & Enterprise	$319	Protects corporate accounts with Merkle-linked SHA-256 tamper-proof logs to guarantee 100% compliance with corporate audit trail mandates.

#	TITAN NAME	CLASS / TIER	PRICE	HARPER & PRESENTON 1-SENTENCE SUPERPOWER
49	**RQL StoreFlow Global™**	Tier 5: Mesh & Enterprise	**$499**	Powers luxury retail boutiques with multi-currency (AED/USD/EUR) billing and automated Planet Tax-Free QR generation without $289/mo cloud POS rentals.
50	**RQL KitchenMesh™**	Tier 5: Mesh & Enterprise	**$249**	Routes customer orders instantly from cashier counters to kitchen display printers over a local router mesh that never crashes during dinner rush.
51	**RQL TableOrder™**	Tier 5: Mesh & Enterprise	**$189**	Enables restaurant waitstaff to record dine-in orders on offline tablets with instant zero-cloud wireless dispatch straight to the kitchen.
52	**RQL RoomDesk™**	Tier 5: Mesh & Enterprise	**$269**	Organizes hotel room occupancies, advance bookings, and encrypted guest ID verification on a single visual screen without bloated cloud PMS fees.
53	**RQL SiteMaster™**	Tier 5: Mesh & Enterprise	**$299**	Tracks construction cement truck delivery slips and worker daily wage payouts offline to eliminate contractor material theft and ghost labor.

🏛️ PART II: THE 5-PILLAR ENTERPRISE DOSSIERS (TITANS 01 TO 53)

🛡️ FOUNDATIONAL FLAGSHIPS (PRODUCTS 01 TO 05)

Chassis: Pure Rust Kernels • Zero Cloud • Air-Gapped Workstation Binding

01. RQL DocumentShield™ ($149 | Anchor: Adobe Acrobat $288/yr | Saves: +$685) LIVE 🟢 • WDSI CERTIFIED

Mintage & Escalation: Batch 1: 999 @ $149 (₹12,516) | Batch 2: 9,999 @ $194 (+30%) | Batch 3: 99,999 @ $252 (+69%) | Final Cap: 999,999 @ $327 (+120%) • Free Generational Upgrades for Life

1. What is it? An air-gapped forensic document privacy and vector sanitization desktop workstation.

2. What does it do? Permanently destroys classified text, private client figures, and tracking metadata from PDFs and files, preventing catastrophic data leaks.

3. How does it do it? Re-synthesizes targeted vector bounding boxes into raw pixel arrays in RAM and executes permanent DoD 5220.22-M 7-pass sector overwriting to residual file traces.

4. The Results? Guaranteed zero forensic recovery. Law firms, government contractors, and medical clinics save +$685 per seat against recurring Adobe Acrobat subscriptions.

> ⚡ **Superpower: “"Permanently burns redacted text into raw pixels and scrubs forensic metadata so confidential PDFs can never leak."”**

02. RQL WhisperVault™ ($299 | Anchor: Otter.ai $204/yr | Saves: +$463) LIVE 🟢 • WDSI CERTIFIED

Mintage & Escalation: Batch 1: 999 @ $299 (₹25,116) | Batch 2: 9,999 @ $389 (+30%) | Batch 3: 99,999 @ $505 (+69%) | Final Cap: 999,999 @ $657 (+120%) • Free Generational Upgrades for Life

1. What is it? A 100% offline, local CPU speech-to-text artificial intelligence transcription workstation.

2. What does it do? Converts voice recordings, executive board meetings, legal depositions, and medical dictations into millisecond-accurate Word and SRT subtitles without internet.

3. How does it do it? Bundles a quantized native Whisper C++/Rust engine directly on local CPU cache with zero outbound network sockets and zero cloud API keys.

4. The Results? Complete privacy for board meetings. Eliminates cloud eavesdropping risk and recurring Otter.ai/Descript fees, saving +$463/yr.

> ⚡ **Superpower: “"Transcribes audio meetings and dictations 100% locally on CPU with millisecond Word SRT sync and zero cloud eavesdropping."”**

03. RQL Sovereign RetailPOS™ ($169 | Anchor: Square Plus $240/yr | Saves: +$551) LIVE 🟢 • WDSI CERTIFIED

Mintage & Escalation: Batch 1: 999 @ $169 (₹14,196) | Batch 2: 9,999 @ $220 (+30%) | Batch 3: 99,999 @ $286 (+69%) | Final Cap: 999,999 @ $371 (+120%) • Free Generational Upgrades for Life

1. What is it? A bare-metal, offline retail Point of Sale (POS) and thermal receipt billing engine.

2. What does it do? Rings up retail customers, balances shift cash drawers, manages inventory, and prints 80mm thermal bills with zero broadband internet.

3. How does it do it? Built with an embedded, transactional local SQLite engine running in native Win32, communicating with USB/Serial thermal printers via raw ESC/POS byte buffers in <10ms.

4. The Results? Checkout lines never freeze during internet outages. Replaces Square Plus and cloud POS hardware rentals, saving +$551/yr per till.

> ⚡ **Superpower: “"Dispatches 80mm thermal receipts and balances shift cash drawers in under 10ms with zero internet and zero monthly fees."”**

04. RQL StoreChain™ ($179 | Anchor: Cloud Multi-Till $420/yr | Saves: +$961)

LIVE 🟢 • WDSI CERTIFIED

Mintage & Escalation: Batch 1: 999 @ $179 (₹15,036) | Batch 2: 9,999 @ $233 (+30%) | Batch 3: 99,999 @ $303 (+69%) | Final Cap: 999,999 @ $393 (+120%) • Free Generational Upgrades for Life

1. What is it? A localized multi-till inventory and sales ledger synchronizer for retail chains.

2. What does it do? Keeps up to 5 checkout registers in a store synchronized in real-time without relying on external cloud servers or broadband internet.

3. How does it do it? Utilizes an offline peer-to-peer Wi-Fi/LAN router mesh where registers broadcast encrypted JSON state diffs directly to each other over local UDP/TCP sockets.

4. The Results? If the internet cable is cut, the retail store continues operating and syncing across all registers seamlessly, saving +$961/yr against multi-till SaaS.

> ⚡ **Superpower: “"Synchronizes retail checkout tills over an offline local router mesh with automatic failover if the shop internet drops."”**

05. RQL Conduit™ ($129 | Anchor: Speedify Teams $180/yr | Saves: +$411)

LIVE 🟢 • WDSI CERTIFIED

Mintage & Escalation: Batch 1: 999 @ $129 (₹10,836) | Batch 2: 9,999 @ $168 (+30%) | Batch 3: 99,999 @ $218 (+69%) | Final Cap: 999,999 @ $283 (+120%) • Free Generational Upgrades for Life

1. What is it? A high-speed, direct peer-to-peer local network (LAN) data transmission engine.

2. What does it do? Transfers massive multi-gigabyte video projects, database backups, and disk images between local PCs at maximum physical wire speed.

3. How does it do it? Bypasses internet, cloud storage, and middleman servers entirely by opening direct, unthrottled streaming TCP sockets between two machines pushing raw bytes at up to 1,000 Mbps.

4. The Results? A 50GB file transfers in 6 minutes instead of 4 hours on WeTransfer or Google Drive, saving +$411/yr against cloud transfer subscriptions.

> ⚡ **Superpower: “"Transfers multi-gigabyte files between local PCs over direct P2P LAN sockets at raw wire speed without cloud middleman servers."”**

⚡ TIER 1: ATOMIC SURGICAL TITANS (PRODUCTS 06 TO 15)

Chassis: Pure In-Memory Algorithms • Zero Complex Dependencies • Sub-Second Execution

06. RQL HashCheck™ ($39 | Anchor: HashTab $60/yr | Saves: +$141)

LIVE 🟢 • WDSI CERTIFIED

Mintage & Escalation: Batch 1: 999 @ $39 | Batch 2: 9,999 @ $51 | Batch 3: 99,999 @ $66 | Final Cap: 999,999 @ $86

1. What is it? A high-throughput, parallel cryptographic checksum and file integrity validator.

2. What does it do? Verifies whether downloaded software, disk ISOs, or database archives are genuine, corrupted, or tampered with.

3. How does it do it? Streams multi-gigabyte files into RAM using memory-mapped I/O (mmap), computing SHA-256, SHA-512, and Blake3 simultaneously in a single parallel CPU pass at 500MB+/sec.

4. The Results? Traps silent file corruption and malicious downloads instantly before execution, saving +$141 against paid hashing tools.

> ⚡ **Superpower: “"Streams multi-gigabyte files through SHA-256 and Blake3 in a single parallel pass to trap corrupted downloads instantly."”**

07. RQL QRStudio™ ($79 | Anchor: Bitly $120/yr | Saves: +$281)

LIVE 🟢 • WDSI CERTIFIED

Mintage & Escalation: Batch 1: 999 @ $79 | Batch 2: 9,999 @ $103 | Batch 3: 99,999 @ $134 | Final Cap: 999,999 @ $174

1. What is it? A permanent vector QR code and barcode design studio for commercial brands.

2. What does it do? Generates unlimited high-resolution SVG and PNG QR codes with embedded center brand logos, colors, and vCards directly on desktop.

3. How does it do it? Encodes raw URLs and data matrices directly into vector geometry on local CPU with zero cloud redirect middleman servers, pointing straight to destination forever.

4. The Results? QR codes never expire, never break, and never show third-party ads, replacing Bitly and QR Tiger subscriptions to save +$281/yr.

> ⚡ **Superpower: “"Generates permanent, non-expiring custom vector brand QR codes directly on your PC with zero cloud redirect middlemen."”**

08. RQL TextDiff™ ($89 | Anchor: Draftable Desktop $150/yr | Saves: +$361)

LIVE 🟢 • WDSI CERTIFIED

Mintage & Escalation: Batch 1: 999 @ $89 | Batch 2: 9,999 @ $116 | Batch 3: 99,999 @ $150 | Final Cap: 999,999 @ $196

1. What is it? A sub-millisecond side-by-side text, source code, and contract comparison visualizer.

2. What does it do? Highlights character additions, clause alterations, and code discrepancies between two files without cloud exposure.

3. How does it do it? Runs a native Rust Myers/Patience diff algorithm in RAM, processing over 600,000 lines/sec with sub-16ms dual-pane visual highlighting.

4. The Results? Lawyers and developers detect stealth contract changes instantly without uploading private code to online checkers, saving +$361/yr.

> ⚡ **Superpower: “"Highlights contract clause alterations and code discrepancies side-by-side with millisecond precision and zero cloud exposure."”**

09. RQL Renamer™ ($47 | Anchor: Cloud Bulk Rename $60/yr | Saves: +$167)

LIVE 🟢 • WDSI CERTIFIED

Mintage & Escalation: Batch 1: 999 @ $47 | Batch 2: 9,999 @ $61 | Batch 3: 99,999 @ $79 | Final Cap: 999,999 @ $103

1. What is it? A high-speed batch file renaming and folder reorganization workstation.

2. What does it do? Renames tens of thousands of messy photos, receipts, invoices, and documents in seconds using regex rules, sequential numbers, and date patterns.

3. How does it do it? Scans directory trees into memory, computes new path names in a sub-millisecond dry-run preview, and executes atomic Win32 MoveFileEx system calls.

4. The Results? Photographers and accountants rename 15,000 files in 0.4 seconds with instant rollback safety, saving +$167 against cloud bulk renaming tools.

> ⚡ **Superpower: “"Reorganizes tens of thousands of messy photos, invoices, and files in a single click using high-speed regex and sequential date rules."”**

10. RQL TagEditor™ ($47 | Anchor: SongKong Pro $40/yr | Saves: +$229)

LIVE 🟢 • WDSI CERTIFIED

Mintage & Escalation: Batch 1: 999 @ $47 | Batch 2: 9,999 @ $61 | Batch 3: 99,999 @ $79 | Final Cap: 999,999 @ $103

1. What is it? A lossless, air-gapped audio library metadata and album artwork editor.

2. What does it do? Cleans dirty artist, album, track, and genre tags, and embeds high-resolution cover art directly into MP3, FLAC, and WAV files.

3. How does it do it? Reads and rewrites raw ID3v2, Vorbis comment, and RIFF chunks in-place without re-compressing or degrading the audio waveform.

4. The Results? Audiophiles and studios fix 1,000 album tags in seconds with zero audio quality loss, saving +$229 against SongKong subscriptions.

> ⚡ **Superpower: “"Cleans audio library tags and embeds high-resolution album artwork directly into MP3, FLAC, and WAV files with zero re-encoding loss."”**

11. RQL FontViewer™ ($49 | Anchor: RightFont $60/yr | Saves: +$131)

LIVE 🟢 • WDSI CERTIFIED

Mintage & Escalation: Batch 1: 999 @ $49 (₹3,999) | Batch 2: 9,999 @ $64 | Batch 3: 99,999 @ $83 | Final Cap: 999,999 @ $108

1. What is it? An ultra-lightweight desktop typography inspector and previewer.

2. What does it do? Allows graphic designers and UI engineers to preview and compare thousands of TTF, OTF, and WOFF fonts without installing them to Windows system folders.

3. How does it do it? Directly parses OpenType bezier curves in memory and renders glyph waterfalls using DirectWrite hardware acceleration without polluting the Windows font cache.

4. The Results? Eliminates system freezing and font cache bloat, saving +$135 against RightFont subscriptions.

⚡ **Superpower: “"Renders and previews thousands of TTF, OTF, and WOFF typography glyphs instantly with zero system lag or font cache bloat."”**

12. RQL DPDPShield™ ($89 / ₹6,999 | Anchor: Adobe Pro ₹24,000/yr | Saves: +₹58,000)

LIVE 🟢 • WDSI CERTIFIED

Mintage & Escalation: Batch 1: 999 @ $89 (₹6,999) | Batch 2: 9,999 @ $116 | Batch 3: 99,999 @ $150 | Final Cap: 999,999 @ $196

1. What is it? An air-gapped Indian sovereign data sanitization and Digital Personal Data Protection Act (DPDP Act 2023) compliance workstation.

2. What does it do? Automatically detects and permanently destroys Aadhaar numbers, PAN cards, GSTINs, bank accounts, and mobile numbers from client PDFs, generating court-admissible audit certificates.

3. How does it do it? Runs native Rust vector stream rewriting with built-in 12-digit Verhoeff Aadhaar checksum validation, burns redacted text into raw pixels, and writes DoD 5220.22-M sector wiping to residual disk traces.

4. The Results? Indian CAs, legal chambers, hospitals, and IT vendors achieve 100% DPDP Act compliance, eliminating ₹250-crore regulatory penalty risks and saving +₹58,000 against Adobe Acrobat rentals.

⚡ **Superpower: “"Destructively scrubs Aadhaar, PAN, and banking identifiers from client PDFs with 1-click DPDP Act 2023 court-admissible audit certification."”**

13. RQL PriceTag™ ($79 / ₹6,499 | Anchor: Labeljoy $84/yr | Saves: +$311)

LIVE 🟢 • WDSI CERTIFIED

Mintage & Escalation: Batch 1: 999 @ $79 (₹6,499) | Batch 2: 9,999 @ $103 | Batch 3: 99,999 @ $134 | Final Cap: 999,999 @ $174

1. What is it? A batch retail shelf price-sticker and barcode label designer.

2. What does it do? Generates clean, printable supermarket shelf edge price labels with item names, prices, and EAN/UPC barcodes in seconds.

3. How does it do it? Ingests simple CSV/Excel product lists and renders pixel-perfect PDF print sheets formatted for standard sticker sheets (e.g. Avery 24-up).

4. The Results? Eliminates messy handwritten price tags on store shelves and prevents cashier pricing disputes, saving +$281 against Labeljoy.

⚡ **Superpower: “"Generates batch retail shelf labels and price stickers with barcodes in seconds, eliminating handwriting errors on store shelves."”**

14. RQL InvoiceGen™ ($89 / ₹7,499 | Anchor: Zoho Invoice $180/yr | Saves: +$451)

STAGED

Mintage & Escalation: Batch 1: 999 @ $89 (₹7,499) | Batch 2: 9,999 @ $116 | Batch 3: 99,999 @ $150 | Final Cap: 999,999 @ $196

1. What is it? A 2-second sovereign offline PDF invoice and tax estimate workstation with statutory Indian GST/VAT calculations and dynamic UPI QR embedding.

2. What does it do? Generates publication-grade PDF tax invoices with itemized line items, automated CGST/SGST/IGST tax splits, discount calculations, and instant mobile scan-to-pay UPI QR codes without internet connectivity.

3. How does it do it? Compiles vector PDF byte streams directly in RAM with embedded font tables in under 2 seconds, while rendering real-time previews and dispatching to 80mm/58mm thermal ESC/POS receipt slips.

4. The Results? Retailers, consultancies, and MSMEs generate compliant tax invoices and collect payments instantly with zero recurring cloud subscriptions, saving +$451/yr against Zoho Invoice and FreshBooks.

> ⚡ **Superpower: “"Generates 2-second sovereign PDF tax invoices with automated GST/VAT splits, thermal receipt dispatch, and dynamic UPI QR embedding with zero cloud telemetry.""**

15. RQL CSVFormat™ ($89 / ₹6,999 | Anchor: Gigasheet Cloud $144/yr | Saves: +$343)

STAGED

Mintage & Escalation: Batch 1: 999 @ $89 | Batch 2: 9,999 @ $116 | Batch 3: 99,999 @ $150 | Final Cap: 999,999 @ $196

1. What is it? A bare-metal, high-speed Big Data CSV sanitizer, deduplicator, and splitter.

2. What does it do? Opens, cleans, deduplicates, and splits massive 5,000,000+ row CSV and TXT files that cause Microsoft Excel to freeze and crash.

3. How does it do it? Utilizes Rust memory-mapped streaming buffers and multi-threaded SIMD byte scanning to process gigabyte-scale datasets in seconds.

4. The Results? Data analysts clean a 10GB transaction ledger in 3 seconds without uploading proprietary data to cloud tools, saving +$343/yr against Gigasheet.

> ⚡ **Superpower: “"Deduplicates, sanitizes, and splits million-row CSV files in seconds without Excel freezing or cloud upload limits.""**

🔒 TIER 2: EVERYDAY DOCUMENT & PRIVACY TITANS (PRODUCTS 16 TO 25)

Chassis: Focused Local Storage • Direct PDF Stream Processing • Local Media Extractors

16. RQL MarkdownPad™ ($49 / ₹3,999 | Anchor: Ulysses/Bear $72/yr | Saves: +$167)

STAGED

Mintage & Escalation: Batch 1: 999 @ $49 | Batch 2: 9,999 @ $64 | Batch 3: 99,999 @ $83 | Final Cap: 999,999 @ $108

1. What is it? A distraction-free, instantaneous offline Markdown desk with real-time vector preview.

2. What does it do? Writes, formats, and exports documentation, technical notes, and books to PDF/HTML with zero cloud syncing interruptions.

3. How does it do it? Runs a pure native Win32 text editor buffer paired with a sub-millisecond CommonMark parser compiling AST to Direct2D preview in real-time.

4. The Results? Authors write without cloud lag, telemetry eavesdropping, or subscription lock-ins, saving +$167 against Bear/Ulysses subscriptions.

> ⚡ **Superpower: “"Delivers a distraction-free, instantaneous offline Markdown desk with real-time vector preview and zero cloud syncing interruptions.""**

17. RQL PDFMerge™ ($69 / ₹5,499 | Anchor: Smallpdf $108/yr | Saves: +$255)

STAGED

Mintage & Escalation: Batch 1: 999 @ $69 | Batch 2: 9,999 @ $90 | Batch 3: 99,999 @ $117 | Final Cap: 999,999 @ $152

1. What is it? A local, air-gapped PDF page assembler, splitter, and reorganizer.

2. What does it do? Merges, splits, rotates, and reorders pages in confidential legal briefs and contracts in seconds without internet.

3. How does it do it? Operates directly on the raw PDF cross-reference table (XRef) and object stream hierarchy in memory without rasterizing or re-compressing pages.

4. The Results? Lawyers assemble court filings instantly without uploading private client records to sketchy free online PDF web converters, saving +$255/yr.

> ⚡ **Superpower: “"Merges, splits, and reorders confidential legal PDFs offline in seconds without exposing private client files to sketchy online converters."”**

18. RQL FileShredder™ ($59 | Anchor: Blancco Cloud $96/yr | Saves: +$229)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $59 | Batch 2: 9,999 @ $77 | Batch 3: 99,999 @ $100 | Final Cap: 999,999 @ $130

1. What is it? A standalone DoD 5220.22-M military-grade digital file destruction utility.

2. What does it do? Permanently destroys sensitive financial, personal, or corporate files so that even hardware forensic labs cannot recover them.

3. How does it do it? Overwrites file disk sectors with 7 alternating passes of 0x00, 0xFF, and pseudo-random entropy, flushes hardware cache via FlushFileBuffers, and zeroes filename before unlinking.

4. The Results? Guarantees zero residual data when disposing of business laptops or decommissioning servers, saving +$229 against Blancco Cloud.

> ⚡ **Superpower: “"Overwrites sensitive client files using permanent multi-pass DoD 5220.22-M sector wiping so deleted data can never be forensically recovered."”**

19. RQL ClipVault™ ($39 | Anchor: Paste App Cloud $48/yr | Saves: +$105)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $39 | Batch 2: 9,999 @ $51 | Batch 3: 99,999 @ $66 | Final Cap: 999,999 @ $86

1. What is it? An encrypted, local-only Windows clipboard manager and history buffer.

2. What does it do? Remembers copied text, code snippets, and images with instant fuzzy search without transmitting clipboard data across the web.

3. How does it do it? Hooks standard Win32 clipboard notification APIs (AddClipboardFormatListener), storing entries in an AES-256 encrypted local SQLite database with zero network permissions.

4. The Results? Users never lose a copied paragraph or API token, completely eliminating clipboard telemetry leak risks and saving +$105 against Paste app.

> ⚡ **Superpower: “"Stores and searches encrypted local clipboard history with zero background internet telemetry or accidental text overwrite loss."”**

20. RQL ImageBatch™ ($69 | Anchor: TinyPNG Pro $108/yr | Saves: +$255)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $69 | Batch 2: 9,999 @ $90 | Batch 3: 99,999 @ $117 | Final Cap: 999,999 @ $152

1. What is it? A high-throughput offline image compressor, resizer, and WebP converter.

2. What does it do? Compresses thousands of high-resolution product photos, banners, and screenshots by up to 80% without visible loss in quality.

3. How does it do it? Employs multi-threaded SIMD quantization (libimagequant/oxipng algorithms) compiled directly to native x86_64 machine code, processing 50 images per second.

4. The Results? E-commerce stores crush page load times and save gigabytes of server storage without paying TinyPNG cloud API monthly fees, saving +$255/yr.

> ⚡ **Superpower: “"Resizes, watermarks, and converts thousands of product images to WebP/JPG locally in seconds without cloud upload bottlenecks."”**

21. RQL AudioExtract™ ($49 | Anchor: CloudConvert Pro $84/yr | Saves: +$203)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $49 | Batch 2: 9,999 @ $64 | Batch 3: 99,999 @ $83 | Final Cap: 999,999 @ $108

1. What is it? A single-click local audio demuxer and stream stripper.

2. What does it do? Extracts pristine lossless audio tracks (WAV, MP3, AAC, FLAC) from large 4K video files in seconds without launching heavy video editing suites.

3. How does it do it? Reads the video container atoms (MP4/MKV/MOV) directly, copying the compressed audio packets directly into an audio container without re-encoding CPU overhead.

4. The Results? Podcasters and video editors extract audio from a 2-hour 4K recording in 3 seconds flat, saving +$203 against online conversion subscriptions.

> ⚡ **Superpower: “"Rips pristine lossless audio tracks from large video files in one click without launching heavy editing software."”**

22. RQL SubtitleSync™ ($89 | Anchor: HappyScribe $144/yr | Saves: +$343)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $89 | Batch 2: 9,999 @ $116 | Batch 3: 99,999 @ $150 | Final Cap: 999,999 @ $196

1. What is it? A precision millisecond subtitle time-shifter and format converter.

2. What does it do? Fixes out-of-sync movie and course subtitles and converts effortlessly between SRT, VTT, ASS, and SUB formats.

3. How does it do it? Parses timestamp timecodes into microsecond integers in RAM, applies linear timecode offset stretching or compression, and writes normalized UTF-8 subtitle tracks.

4. The Results? Video creators and translators achieve perfect subtitle synchronization in 2 clicks without paying recurring HappyScribe fees, saving +$343/yr.

> ⚡ **Superpower: “"Adjusts video subtitle timing with millisecond offset shifting and converts SRT/VTT formats offline without monthly SaaS subscriptions."”**

23. RQL SpaceMap™ ($39 | Anchor: TreeSize Pro $60/yr | Saves: +$141)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $39 | Batch 2: 9,999 @ $51 | Batch 3: 99,999 @ $66 | Final Cap: 999,999 @ $86

1. What is it? A lightning-fast visual disk storage analyzer and interactive treemap generator.

2. What does it do? Pinpoints the exact hidden files, bloated caches, and forgotten virtual machines consuming hard drive space in seconds.

3. How does it do it? Directly traverses the NTFS Master File Table (MFT) using low-level Win32 directory handles, scanning 500,000 files in under 2 seconds and rendering an interactive visual treemap.

4. The Results? Solves Windows "Low Disk Space" panic instantly without paid utilities, saving +$141 against TreeSize Pro licenses.

> ⚡ **Superpower: “"Visualizes disk storage with interactive high-speed treemaps to expose hidden gigabyte bloat and solve Disk Full errors instantly."”**

24. RQL DocProtect™ ($49 | Anchor: Adobe Protect $60/yr | Saves: +$131)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $49 | Batch 2: 9,999 @ $64 | Batch 3: 99,999 @ $83 | Final Cap: 999,999 @ $108

1. What is it? An offline PDF security vault, permission locker, and digital watermarking station.

2. What does it do? Applies military-grade AES-256 encryption to confidential PDF documents, restricts printing, copying, and modification, and embeds dynamic forensic ownership watermarks.

3. How does it do it? Rewrites PDF security dictionary structures directly in RAM with authenticated AES-256 standard encryption without third-party cloud tools.

4. The Results? Professionals protect proprietary whitepapers, proposals, and contracts with zero cloud leak risks, saving +$131 against Adobe Acrobat subscriptions.

> ⚡ **Superpower: “"Locks confidential PDFs with authenticated AES-256 encryption, granular printing permissions, and dynamic watermarks offline."”**

25. RQL CashDrawer™ ($89 | Anchor: POS Cash Control $144/yr | Saves: +$343)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $89 | Batch 2: 9,999 @ $116 | Batch 3: 99,999 @ $150 | Final Cap: 999,999 @ $196

1. What is it? An offline retail shift cash balance and theft reconciliation station.

2. What does it do? Reconciles opening float, cash sales, paid-out expenses, and closing cash counts to detect cashier shortages and prevent employee theft.

3. How does it do it? Implements double-entry cash accounting with encrypted cryptographic audit logs that cannot be edited retroactively by shift cashiers.

4. The Results? Store managers eliminate daily cash register discrepancies and catch till skimming immediately, saving +$343/yr against cloud retail tools.

> ⚡ **Superpower: “"Reconciles opening cash, shift payouts, and closing registers to stop register shortages and counter employee theft."”**

🚀 TIER 3: BIG SYSTEM ENGINES & NETWORK TITANS (PRODUCTS 26 TO 35)

Chassis: Windows Native System APIs • Compression Pipelines • Network Sockets

26. RQL ReceiptPrinter™ ($59 | Anchor: Hardware Test Suites $96/yr | Saves: +$229)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $59 | Batch 2: 9,999 @ $77 | Batch 3: 99,999 @ $100 | Final Cap: 999,999 @ $130

1. What is it? An interactive USB/Serial thermal receipt visual designer and hardware tester.

2. What does it do? Tests and visualizes 58mm and 80mm ESC/POS thermal receipt formatting directly against printer hardware before deploying to store registers.

3. How does it do it? Translates visual design blocks directly into raw ESC/POS byte sequences (GS, ESC commands), sending raw bytes via Win32 Spooler API without driver distortion.

4. The Results? Retail developers debug thermal receipts in seconds without wasting reams of paper, saving +$229 against commercial printer testing suites.

> ⚡ **Superpower: “"Tests and visualizes 58mm/80mm USB thermal receipt formatting directly against ESC/POS hardware with zero broken alignment."”**

27. RQL DiskClean™ ($49 | Anchor: CCleaner Pro $60/yr | Saves: +$131)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $49 | Batch 2: 9,999 @ $64 | Batch 3: 99,999 @ $83 | Final Cap: 999,999 @ $108

1. What is it? A privacy-first, bare-metal Windows disk and duplicate cleaner.

2. What does it do? Sweeps away forgotten crash dumps, leftover installer caches, and exact duplicate files without risking system files or personal data.

3. How does it do it? Performs multi-threaded SHA-256 block hashing on candidate duplicate files and uses explicit white-listed Windows cleanup paths with zero telemetry.

4. The Results? Frees 20GB+ of space in seconds without installing adware-ridden third-party cleaners, saving +$131 against CCleaner subscriptions.

> ⚡ **Superpower: “"Scans hard drives with multi-threaded byte hashing to purge duplicate files and hidden system junk without risking personal documents."”**

28. RQL ArchiveMaster™ ($39 | Anchor: WinZip Pro $54/yr | Saves: +$123)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $39 | Batch 2: 9,999 @ $51 | Batch 3: 99,999 @ $66 | Final Cap: 999,999 @ $86

1. What is it? A high-speed, zero-nag file compression and AES-256 encryption engine.

2. What does it do? Compresses and extracts ZIP, 7Z, and TAR archives at maximum multi-core CPU throughput with zero annoying popup ads or expiration warnings.

3. How does it do it? Built on pure Rust flate2 and liblzma bindings, utilizing multi-threaded deflate pipelines and AES-256-GCM authenticated encryption.

4. The Results? Super-fast compression with zero adware or yearly renewal fees, saving +$123 against WinZip Pro licenses.

⚡ **Superpower: ""Compresses and encrypts files into high-speed ZIP, 7z, and TAR archives with authenticated AES-256 and zero nag popups.""**

29. RQL SocketShield™ ($79 | Anchor: Wireshark Sentinel $120/yr | Saves: +$281)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $79 | Batch 2: 9,999 @ $103 | Batch 3: 99,999 @ $134 | Final Cap: 999,999 @ $174

1. What is it? A lightweight local socket security auditor and anomalous connection detector.

2. What does it do? Detects which applications on your PC are opening hidden ports, listening for incoming connections, or secretly transmitting telemetry.

3. How does it do it? Queries the Windows IP Helper API (GetExtendedTcpTable / GetExtendedUdpTable) every 250ms, mapping active sockets directly to process PIDs and executable file paths.

4. The Results? Pinpoints spyware, miners, and unauthorized background processes instantly without running heavy packet capture drivers, saving +$281/yr.

⚡ **Superpower: ""Inspects raw TCP/UDP socket payloads and flags anomalous outbound telemetry at the local socket boundary.""**

30. RQL PingPulse™ ($69 | Anchor: PingPlotter Pro $108/yr | Saves: +$255)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $69 | Batch 2: 9,999 @ $90 | Batch 3: 99,999 @ $117 | Final Cap: 999,999 @ $152

1. What is it? A microsecond-precision network latency and packet loss monitor.

2. What does it do? Tracks internet connection quality and flags ISP packet jitter and drops with audible alarms during critical trading or gaming sessions.

3. How does it do it? Employs asynchronous ICMP echo requests through the native Win32 IcmpSendEcho API, generating sub-millisecond timeline graphs without network driver overhead.

4. The Results? Proves ISP degradation during client calls or trading hours with exportable proof logs, saving +$255/yr against PingPlotter Pro.

⚡ **Superpower: ""Monitors multi-endpoint latency with audible packet drop alarms to diagnose unstable Wi-Fi and ISP lag during trading or gaming.""**

31. RQL FolderSync™ ($59 | Anchor: GoodSync Business $84/yr | Saves: +$193)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $59 | Batch 2: 9,999 @ $77 | Batch 3: 99,999 @ $100 | Final Cap: 999,999 @ $130

1. What is it? An offline, high-speed directory mirror and differential backup workstation.

2. What does it do? Clones project directories, photos, and databases to external backup drives, copying only the exact bytes that changed.

3. How does it do it? Performs fast filesystem timestamp and size comparison combined with Blake3 rolling chunk hashing, utilizing Win32 CopyFile2 with progress hooks.

4. The Results? Backs up 100GB of changes in 30 seconds without paying cloud backup subscriptions, saving +$193 against GoodSync.

⚡ **Superpower: ""Mirrors directories to external backup drives with delta-only copying and auto-sync triggers without recurring cloud storage fees.""**

32. RQL ClientLedger™ ($119 | Anchor: Calendly/Salon CRM $180/yr | Saves: +$421)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $119 | Batch 2: 9,999 @ $155 | Batch 3: 99,999 @ $201 | Final Cap: 999,999 @ $261

1. What is it? An offline local client appointment and service history CRM workstation.

2. What does it do? Manages customer contact profiles, service records, VIP history, and bookings on a local PC with zero cloud leaks.

3. How does it do it? Uses an embedded local SQLite engine with full-text search indexing, running entirely within a fast Win32 desktop window without web browser bloat.

4. The Results? Doctors, consultants, and salons manage client records with zero privacy risk and zero monthly SaaS CRM rent, saving +$421/yr.

> **Superpower: “"Manages appointment scheduling and encrypted client service histories locally on your workstation with zero monthly CRM rentals."”**

33. RQL OrderCounter™ ($149 | Anchor: Takeout Queue SaaS $240/yr | Saves: +$571)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $149 | Batch 2: 9,999 @ $194 | Batch 3: 99,999 @ $252 | Final Cap: 999,999 @ $327

1. What is it? An offline restaurant and takeaway customer order queue token engine.

2. What does it do? Issues sequential printed customer queue tokens and coordinates order pickup readiness between counter and kitchen without internet.

3. How does it do it? Runs a local UDP socket broadcasting token state changes directly to a companion kitchen display monitor and serial token printer.

4. The Results? Food joints clear ordering chaos with zero internet dependence, saving +$571/yr against cloud queue management subscriptions.

> **Superpower: “"Prints sequential customer queue tokens and coordinates takeout order readiness at food counters without internet dependency."”**

34. RQL WinTune™ ($49 | Anchor: System Mechanic $72/yr | Saves: +$167)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $49 | Batch 2: 9,999 @ $64 | Batch 3: 99,999 @ $83 | Final Cap: 999,999 @ $108

1. What is it? A single-click Windows telemetry suppressor and latency optimizer.

2. What does it do? Disables background tracking services, removes pre-installed Windows bloatware, and restores sub-10ms system responsiveness.

3. How does it do it? Executes native Registry tweaks and Group Policy toggles directly via Win32 RegOpenKeyEx/RegSetValueEx, terminating known telemetry background services safely.

4. The Results? Reclaims 15% CPU and RAM overhead and stops Microsoft diagnostic tracking with one click, saving +$167 against commercial tuning suites.

> **Superpower: “"Disables Windows telemetry tracking, removes pre-installed bloatware, and restores sub-10ms system responsiveness in one click."”**

35. RQL MediaShrink™ ($89 | Anchor: UniConverter $132/yr | Saves: +$307)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $89 | Batch 2: 9,999 @ $116 | Batch 3: 99,999 @ $150 | Final Cap: 999,999 @ $196

1. What is it? A hardware-accelerated local video condenser and email attachment optimizer.

2. What does it do? Shrinks multi-gigabyte phone and camera videos into crisp 25MB attachments ready for WhatsApp, Slack, and email in seconds.

3. How does it do it? Utilizes native NVENC/AMD hardware H.264/HEVC encoder pipes via Direct3D11 surface mapping, computing optimal two-pass bitrates locally.

4. The Results? Users compress heavy videos in seconds without uploading private clips to web compressors, saving +$307/yr against UniConverter.

> **Superpower: “"Compresses gigabyte video files into lightweight 25MB attachments while preserving sharp visual quality for email and chat sharing."”**

💼 TIER 4: SPECIALIZED RETAIL, CLINICAL & HARDWARE KHATA (PRODUCTS 36 TO 45)

Chassis: RS-232 COM Serial Scales • Clinical Audit Ledgers • Bluetooth Route Printers

36. RQL ScreenCap™ ($99 | Anchor: Loom Business $150/yr | Saves: +$351)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $99 | Batch 2: 9,999 @ $129 | Batch 3: 99,999 @ $167 | Final Cap: 999,999 @ $218

1. What is it? A 4K 60FPS offline desktop screen recorder and video tutorial studio.

2. What does it do? Records crystal-clear desktop tutorials, audio commentary, and bug demos directly to local MP4/MKV files with zero cloud uploads.

3. How does it do it? Captures screen frames via the Windows Graphics Capture API (Direct3D11), streaming directly to local NVENC/AMF hardware encoder buffers.

4. The Results? Engineers and educators record private code walkthroughs with zero cloud exposure, saving +$351/yr against Loom Business subscriptions.

⚡ **Superpower: “"Records crystal-clear 60 FPS desktop screen tutorials and microphone audio locally without watermarks, cloud lag, or monthly fees."”**

37. RQL PharmaVault™ ($149 / ₹11,999 | Anchor: Marg ERP $216/yr | Saves: +$499)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $149 (₹11,999) | Batch 2: 9,999 @ $194 | Batch 3: 99,999 @ $252 | Final Cap: 999,999 @ $327

1. What is it? An offline retail pharmacy inventory, expiry tracker, and Schedule H regulatory register.

2. What does it do? Alerts pharmacists 60 days before medicine batches expire, manages salt composition searches, and tracks regulated drug sales automatically.

3. How does it do it? Implements indexed B-Tree batch lookup tables in SQLite, verifying batch manufacturing and expiry dates against daily clock ticks with zero cloud latency.

4. The Results? Chemists eliminate dead expired stock losses and pass government drug inspector audits cleanly, saving +$499 against Marg ERP rentals.

⚡ **Superpower: “"Tracks 60-day pharmacy medicine expiry alerts and maintains Schedule H narcotics registers to eliminate stock loss and regulatory fines."”**

38. RQL KiranaFlow™ ($119 / ₹8,999 | Anchor: Vyapar Desktop $180/yr | Saves: +$421)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $119 (₹8,999) | Batch 2: 9,999 @ $155 | Batch 3: 99,999 @ $201 | Final Cap: 999,999 @ $261

1. What is it? An offline Indian grocery billing desk and customer credit (Udhar) khata register.

2. What does it do? Scans barcodes, tallies weigh-scale inputs, prints thermal bills in Hindi/English, and tracks customer credit balances with zero internet.

3. How does it do it? Built for high-speed single-key numeric keyboard operation, updating local transactional ledgers and generating WhatsApp payment reminders offline.

4. The Results? Small shopkeepers clear long lines during peak hours without internet buffering, saving +$421/yr against Vyapar subscriptions.

⚡ **Superpower: “"Clears supermarket checkout queues with single-key barcode billing while managing customer credit udhar balances 100% offline."”**

39. RQL OpticalVault™ ($179 / ₹13,999 | Anchor: Optometry SaaS $300/yr | Saves: +$721)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $179 (₹13,999) | Batch 2: 9,999 @ $233 | Batch 3: 99,999 @ $303 | Final Cap: 999,999 @ $393

1. What is it? An optometry clinic patient vision prescription and spectacle frame inventory station.

2. What does it do? Records patient eye refraction numbers (SPH, CYL, AXIS, ADD) and tracks lens lab fitting orders so optometrists never lose prescription histories.

3. How does it do it? Maintains encrypted patient medical records linked to frame barcodes and lens manufacturer specifications in an air-gapped local database.

4. The Results? Opticians recall 5-year-old patient prescriptions in 1 second during repeat visits, saving +$721 against cloud optometry software.

⚡ **Superpower: “"Records patient eye refraction powers and manages spectacle frame inventory so opticians never lose patient lens histories."”**

40. RQL MandiFlow™ ($189 / ₹14,999 | Anchor: Mandi ERP $300/yr | Saves: +$711)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $189 (₹14,999) | Batch 2: 9,999 @ $246 | Batch 3: 99,999 @ $319 | Final Cap: 999,999 @ $415

1. What is it? An agricultural auction and grain market (Mandi) commission slip calculator.

2. What does it do? Computes complex agricultural commodity auction slips (Bags × Weight × Rate − Commission − Labor − Cess) in 2 seconds with zero math errors.

3. How does it do it? Executes fractional arithmetic using high-precision 64-bit integer fixed-point math, outputting instant thermal farmer payment receipts.

4. The Results? Commission agents eliminate cash calculation disputes and calculate whole truckload auctions in seconds during morning trading chaos, saving +$711/yr.

⚡ **Superpower: “"Computes agricultural auction slips in seconds (Bags x Weight x Rate - Commission), preventing cash disputes during mandi chaos."”**

41. RQL MedTriage™ ($249 / ₹19,999 | Anchor: Emergency EHR $420/yr | Saves: +$1,011)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $249 (₹19,999) | Batch 2: 9,999 @ $324 | Batch 3: 99,999 @ $421 | Final Cap: 999,999 @ $547

1. What is it? An emergency medical clinic patient intake and critical drug allergy alert workstation.

2. What does it do? Captures emergency patient vitals, medical history, and dangerous drug contraindication alerts in three fast keystrokes without slowing emergency care.

3. How does it do it? Employs memory-resident clinical drug interaction lookup tables, checking prescribed drug pairs against patient allergy flags in under 1 millisecond.

4. The Results? Emergency doctors prevent fatal drug reaction mistakes during chaotic patient intake, saving +$1,011 against bloated hospital EHR subscriptions.

⚡ **Superpower: “"Captures emergency clinic patient intake and critical drug allergy alerts in three keystrokes without slowing emergency doctor care."”**

42. RQL LabReport™ ($219 / ₹16,999 | Anchor: Pathology LIMS $360/yr | Saves: +$861)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $219 (₹16,999) | Batch 2: 9,999 @ $285 | Batch 3: 99,999 @ $370 | Final Cap: 999,999 @ $481

1. What is it? An offline diagnostic pathology laboratory test report designer and QR verification system.

2. What does it do? Formats clinical blood, urine, and diagnostic test reports with reference ranges, doctor digital signatures, and anti-tamper verification QR codes.

3. How does it do it? Compiles lab test parameter tables into medical-grade PDF documents with embedded cryptographic SHA-256 validation QR codes without cloud servers.

4. The Results? Pathology labs print beautiful patient test reports in seconds without paying expensive monthly cloud LIMS rentals, saving +$861/yr.

⚡ **Superpower: “"Formats clean diagnostic pathology lab test reports with anti-tamper verification QR codes without cloud software subscriptions."”**

43. RQL ChequeMaster™ ($79 / ₹5,999 | Anchor: Tally Add-on $120/yr | Saves: +$281)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $79 (₹5,999) | Batch 2: 9,999 @ $103 | Batch 3: 99,999 @ $134 | Final Cap: 999,999 @ $174

1. What is it? A millimeter-precise bank business cheque printing and clearing ledger.

2. What does it do? Prints payee names, amounts in words, and account-payee crosses onto pre-printed cheque leaves across all major banks without handwriting mistakes.

3. How does it do it? Stores millimeter dimensional layout templates for over 50 banks, feeding coordinates directly to standard desktop office printers with zero distortion.

4. The Results? Accounts teams eliminate bounced or voided cheques caused by handwriting errors, saving +$281 against accounting add-on subscriptions.

> ⚡ **Superpower: “"Prints millimeter-accurate bank business cheques across all Indian banks while maintaining an automated clearing reconciliation log."”**

44. RQL FleetTransit™ ($279 / ₹21,999 | Anchor: Weighbridge Cloud $420/yr | Saves: +$981)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $279 (₹21,999) | Batch 2: 9,999 @ $363 | Batch 3: 99,999 @ $472 | Final Cap: 999,999 @ $613

1. What is it? An automated serial weighbridge scale logger and vehicle gross-tare slip printer.

2. What does it do? Pulls live vehicle weight readings directly from industrial RS-232 serial scale indicators to print tamper-proof weight slips without human tampering.

3. How does it do it? Reads serial COM port data streams (Baud 9600/4800) in real-time, locking weight readings upon scale stabilization and generating instant encrypted receipts.

4. The Results? Weighbridge operators eliminate operator bribery and truck overloading disputes, saving +$981 against weighbridge cloud software.

> ⚡ **Superpower: “"Pulls live gross and tare vehicle weights directly from RS-232 serial weighbridge scales to eliminate operator slip tampering."”**

45. RQL BiltyPro™ ($239 / ₹18,999 | Anchor: Transport SaaS $360/yr | Saves: +$841)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $239 (₹18,999) | Batch 2: 9,999 @ $311 | Batch 3: 99,999 @ $404 | Final Cap: 999,999 @ $525

1. What is it? An offline transport logistics Lorry Receipt (LR) and freight bill generator.

2. What does it do? Dispatches legal transport Bilty/LR receipts in 3 seconds with automated freight tax (GST RCM), driver advance, and e-Way Bill tracking.

3. How does it do it? Automatically calculates consignor/consignee freight balances and prints 3-part carbonless transport manifests directly on dot-matrix or laser printers.

4. The Results? Fleet operators dispatch trucks on time without waiting for internet connectivity or paying transport portal fees, saving +$841/yr.

> ⚡ **Superpower: “"Generates compliant 3-second transport Lorry Receipts (LRs) with automated e-Way Bill and freight tax calculations without internet."”**

👑 TIER 5: DISTRIBUTED P2P MESH & LUXURY EMPIRES (PRODUCTS 46 TO 53)

Chassis: Peer-to-Peer Local Router Mesh • Multi-Currency FX Engine • Biometric Gate IO

46. RQL AutoDistro™ ($289 / ₹22,999 | Anchor: FMCG Route Cloud $480/yr | Saves: +$1,151)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $289 (₹22,999) | Batch 2: 9,999 @ $376 | Batch 3: 99,999 @ $488 | Final Cap: 999,999 @ $635

1. What is it? An offline FMCG delivery van route invoicing and stock reconciliation station.

2. What does it do? Allows delivery drivers to invoice rural retail shops and print Bluetooth thermal bills on the road with automated end-of-day stock balance.

3. How does it do it? Runs on ruggedized Windows tablets with local SQLite ledgers, communicating with portable Bluetooth ESC/POS printers with zero mobile data reliance.

4. The Results? Distributors deliver goods to remote retail shops without network dead-zone delays, saving +$1,151/yr per vehicle against route ERP rentals.

> ⚡ **Superpower: “"Empowers delivery vans to invoice rural retail shops and print Bluetooth thermal bills offline with end-of-route stock balancing."”**

47. RQL ClothMatrix™ ($249 | Anchor: Apparel Size/Color ERP $360/yr | Saves: +$831)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $249 (₹20,916) | Batch 2: 9,999 @ $324 | Batch 3: 99,999 @ $421 | Final Cap: 999,999 @ $547

1. What is it? A 3D dimensional apparel size, color, and fit matrix inventory workstation.

2. What does it do? Tracks clothing stock across multidimensional grids (Size × Color × Brand) to prevent apparel retailers from over-ordering dead sizes.

3. How does it do it? Organizes inventory in a multi-dimensional matrix array, generating barcode stickers with encoded size-color attributes for instant scanner subtraction.

4. The Results? Fashion boutiques eliminate unsold dead inventory and maintain perfect size availability on shelves, saving +$831 against apparel ERP SaaS.

> ⚡ **Superpower: “"Manages garment stock in a real-time 3D inventory grid (Size x Color x Brand) to prevent apparel retailers from over-ordering dead sizes."”**

48. RQL LedgerGuard™ ($319 | Anchor: MCA Rule 11(g) SaaS $480/yr | Saves: +$1,121)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $319 (₹26,796) | Batch 2: 9,999 @ $415 | Batch 3: 99,999 @ $539 | Final Cap: 999,999 @ $701

1. What is it? A cryptographic tamper-evident corporate audit trail and ledger seal engine.

2. What does it do? Protects accounting ledgers by recording immutable, time-stamped edit histories to guarantee 100% compliance with statutory audit trail mandates.

3. How does it do it? Computes a Merkle-linked SHA-256 cryptographic chain for every ledger modification, making retroactive accounting adjustments mathematically detectable.

4. The Results? Companies satisfy strict corporate regulatory compliance (MCA Rule 11(g) / Sarbanes-Oxley) without paying thousands in cloud compliance software, saving +$1,121/yr.

> ⚡ **Superpower: “"Protects corporate accounts with Merkle-linked SHA-256 tamper-proof logs to guarantee 100% compliance with corporate audit trail mandates."”**

49. RQL StoreFlow Global™ ($499 / AED 1,899 | Anchor: Dubai POS $3,468/yr | Saves: +$9,905) QUEUED

Mintage & Escalation: Batch 1: 999 @ $499 (₹41,916) | Batch 2: 9,999 @ $649 | Batch 3: 99,999 @ $843 | Final Cap: 999,999 @ $1,096

1. What is it? A multi-currency luxury boutique Point of Sale and international tourist tax refund engine.

2. What does it do? Powers high-end luxury retailers with real-time multi-currency (AED, USD, EUR, GBP) billing and automated Planet Tax-Free tourist QR code generation.

3. How does it do it? Integrates local currency rate tables and UAE Federal Tax Authority (FTA) compliant invoice formats with hardware thermal and A4 receipt printers.

4. The Results? Luxury boutiques in Dubai Mall and Mayfair process VIP international shoppers in seconds without paying $289/month cloud POS rentals, saving +$9,905 over 3 years.

> ⚡ **Superpower: “"Powers luxury retail boutiques with multi-currency (AED/USD/EUR) billing and automated Planet Tax-Free QR generation without $289/mo cloud POS rentals."”**

50. RQL KitchenMesh™ ($249 | Anchor: Restaurant Cloud POS $420/yr | Saves: +$1,011) QUEUED

Mintage & Escalation: Batch 1: 999 @ $249 (₹20,916) | Batch 2: 9,999 @ $324 | Batch 3: 99,999 @ $421 | Final Cap: 999,999 @ $547

1. What is it? A peer-to-peer local router mesh Kitchen Order Ticket (KOT) dispatcher.

2. What does it do? Relays customer orders from front-desk cashier terminals straight to kitchen display screens and hot-line ticket printers over local Wi-Fi.

3. How does it do it? Direct TCP socket transmission across local LAN/Wi-Fi router mesh with automated retry queues that guarantee zero lost food orders if a printer temporarily unplugs.

4. The Results? Busy restaurants never drop a food order during peak dinner rush even if the internet drops, saving +$1,011/yr against cloud restaurant POS subscriptions.

> ⚡ **Superpower: “"Routes customer orders instantly from cashier counters to kitchen display printers over a local router mesh that never crashes during dinner rush."”**

51. RQL TableOrder™ ($189 | Anchor: Waiter Tablet Cloud $300/yr | Saves: +$711) QUEUED

Mintage & Escalation: Batch 1: 999 @ $189 (₹15,876) | Batch 2: 9,999 @ $246 | Batch 3: 99,999 @ $319 | Final Cap: 999,999 @ $415

1. What is it? An offline wireless waiter tablet ordering and table management desk.

2. What does it do? Enables restaurant waitstaff to take food orders tableside on handheld tablets and dispatch them wirelessly to the kitchen without internet.

3. How does it do it? Runs a lightweight responsive web/native client over local Wi-Fi, committing table orders straight into the central RQL POS register with zero cloud roundtrips.

4. The Results? Fast table turns and zero waiter order-entry errors during rush hours, saving +$711/yr against cloud waiter subscription apps.

> ⚡ **Superpower: “"Enables restaurant waitstaff to record dine-in orders on offline tablets with instant zero-cloud wireless dispatch straight to the kitchen."”**

52. RQL RoomDesk™ ($269 | Anchor: Hotel PMS Cloud $420/yr | Saves: +$991) QUEUED

Mintage & Escalation: Batch 1: 999 @ $269 (₹22,596) | Batch 2: 9,999 @ $350 | Batch 3: 99,999 @ $455 | Final Cap: 999,999 @ $591

1. What is it? An offline hotel room occupancy, advance booking, and guest check-in management workstation.

2. What does it do? Organizes hotel room status (Clean, Occupied, Reserved), guest ID card scans, and checkout billing on a single visual screen without internet.

3. How does it do it? Renders an interactive visual room grid backed by an encrypted local SQLite database, generating GST/VAT hotel invoices with automated stay calculations.

4. The Results? Boutique hotels and resorts check guests in and out smoothly even during power or internet outages, saving +$991/yr against cloud hotel PMS fees.

> ⚡ **Superpower: “"Organizes hotel room occupancies, advance bookings, and encrypted guest ID verification on a single visual screen without bloated cloud PMS fees."”**

53. RQL SiteMaster™ ($299 | Anchor: Construction ERP $600/yr | Saves: +$1,501)

QUEUED

Mintage & Escalation: Batch 1: 999 @ $299 (₹25,116) | Batch 2: 9,999 @ $389 (+30%) | Batch 3: 99,999 @ $505 (+69%) | Final Cap: 999,999 @ $657 (+120%) • Free Generational Upgrades for Life

1. What is it? An offline construction site material delivery slip and daily wage labor payout tracker.

2. What does it do? Tracks cement truck delivery receipts, sand/steel deliveries, and daily worker wage payouts directly on construction job sites with zero internet.

3. How does it do it? Runs on ruggedized laptops, recording supervisor material approvals and biometric worker day-labor payments with photo-stamped verification.

4. The Results? Builders and contractors eliminate ghost labor and material theft on remote construction sites, saving +$1,501/yr against construction ERP SaaS.

> ⚡ **Superpower: “"Tracks construction cement truck delivery slips and worker daily wage payouts offline to eliminate contractor material theft and ghost labor."”**
